

Q 5 wap to check from three given number that whether a number is greater than or equal to 20 and less than other numbers .print appropriate message .

package Day3;

//Q 5 wap to check from three given number that whether a number is greater than or equal to 20 and less than other numbers .print appropriate message .

```
public class GreaterNumber {  
    public static void main(String[] args) {  
        int a=23;  
        int b=50;  
        int c=100;  
        if(a>=20&&a<b&&a<c)  
        {  
            System.out.println("Condition is Satisfy");  
        }  
        else System.out.println("Condition is not Satisfy");  
    }  
}
```

```
1 package Day3;  
2 //Q 5 wap to check from three given number that whether a number is greater than or equal to 20 and less than other numbers .pr  
3 public class GreaterNumber {  
4     public static void main(String[] args) {  
5         int a=23;  
6         int b=50;  
7         int c=100;  
8         if(a>=20&&a<b&&a<c)  
9         {  
10            System.out.println("Condition is Satisfy");  
11        }  
12        else System.out.println("Condition is not Satisfy");  
13    }  
14 }  
15 }  
16 }
```

Condition is Satisfy
